Date: October 6, 2020

Product: Switch® 62.5WG
EPA Reg. No. 100-953

Use: Addition of a Pest (Target Spot caused by *Corynespora cassicola*) for Control in Tomato

State: Florida

Directions for Use

- **It is a violation of Federal law to use this product in a manner inconsistent with its labeling.**
- **The user must refer to the federally approved labels for the above noted product and read and follow all directions for use, restrictions, and precautions.**
- **The user should have this recommendation in its possession at the time of use.**
- **This recommendation for use of this product is permitted under Section 2(ee) of FIFRA and has not been submitted to or been approved by EPA.**

For control of target spot in Tomato, apply Switch 62.5WG at 11-14 oz/acre. Begin applications prior to or at the onset of disease and repeat applications on a 7-10 day interval if conditions remain favorable for disease development.

Resistance Management: After 2 applications of Switch 62.5WG, alternate with another fungicide with a different mode of action for 2 applications.
