

BLACKOUT

LIQUID HUMIC ACID

Derived from humate

NON-PLANT FOOD INGREDIENT

WARNING - KEEP OUT OF REACH OF CHILDREN

May be harmful if swallowed. May cause irritation of eyes, nose, throat, or skin. Avoid contact with eyes, skin or clothing. In case of contact with eyes, flush with plenty of water. Consult a physician if irritation persists.

NOTICE

May cause staining on handler's apparel. Seller warrants that the product conforms to its chemical description and is reasonably fit for the purposes stated on the label when used in accordance with direction under normal conditions of use. Neither this warranty nor any other warranty of merchantability or fitness for a particular use, expressed or implied, extends to the use of this product contrary to label instructions, or under abnormal conditions, or conditions not reasonably foreseeable to Seller, and Buyer assumes the risk of any such use.

GROWING SMARTER

Guaranteed and Distributed by:
FERTILIZER COMPANY OF ARIZONA, INC.
2850 S. Peart Road
Casa Grande, Arizona 85193-9024

DIRECTIONS FOR USE

Soil Applications: Apply 1-2 gallons per acre or see instructions on this label (Preparing Tank Mix Solutions). Apply banded, in-furrow, side-dressed, or through flood, furrow or drip irrigation.

Foliar Applications: Apply 1/2 to 1 gallon per acre per application with fertilizer using sufficient water (1 gallon) for uniform coverage of the crop. See instructions on this label (Preparing Tank Mix Solutions).

PREPARING TANK MIX SOLUTIONS

Thoroughly clean all spray mixing and application equipment prior to and following each use. Unless directed otherwise by mixing instructions on the label of product to be tank mixed with **BLACKOUT** follow these procedures:

1. Add the desired amount of water to the tank and begin agitation. Add desired spray adjuvant (wetting agent) if the application requires it to be used. **BLACKOUT** will wet and disperse readily without an adjuvant.

2. Drip/Flood irrigation - add **BLACKOUT** at a rate of 1/2 to 1 gallon per acre.

3. Add liquid fertilizer. Do not tank mix herbicides. Do not mix **BLACKOUT** directly with undiluted tank mix partners until you have "jar tested" in a separate container to make sure the products are compatible prior to tank mixing. Agitate and let stand 10 minutes. Settling that does not disperse indicates an incompatible mixture.

4. Continue filling while agitating until products are thoroughly mixed into spray solution.
