3. COMPOSITION/INFORMATION ON INGREDIENTS

Chemical Ingredients:	Percentage by Weight:	CAS No.	PEL/TLV
n-Octanol (Fatty Alcohol C ₈)	35.5%	111-87-5	NE/NE
n-Decanol (Fatty Alcohol C ₁₀)	49.5%	112-30-1	NE/NE
Inert Ingredients	15%		NE/NE

*Formulated from a fatty alcohol mixture that typically contains: C₆-1.0%, C₈-41.0%, C₁₀-57.0%, C₁₂-0.8% Linear Fatty Alcohols.

4. FIRST AID MEASURES

EYES: Immediately flush eyes with plenty of water for at least fifteen minutes, holding eyelids apart to ensure flushing of the entire eye surface. Do not let victim rub eyes. Seek medical attention.

SKIN: Remove contaminated clothing and wash with large amounts of soap and water. If irritation develops, contact a physician.

INGESTION: Call a physician immediately. Only induce vomiting at the instruction of a physician. Never give anything by mouth to an unconscious person. Have person sip a glass of water if able to swallow.

INHALATION: Remove person from area of exposure. Give artificial respiration if necessary. If breathing is difficult, give oxygen if a qualified operator is available. Seek immediate medical attention.

5. FIRE FIGHTING MEASURES

FLASH POINT (°F/Test Method): 230.18°F (110.1°C)

FLAMMABLE LIMITS (LFL & UFL): Not established

EXTINGUISHING MEDIA: Alcohol-resistant foam, dry chemical, CO₂, water spray.

HAZARDOUS COMBUSTION PRODUCTS: None known

SPECIAL FIRE FIGHTING PROCEDURES: Cool exposed equipment with water spray. Self-contained positive-pressure breathing apparatus should be worn when there is a possibility of exposure to smoke, fumes, or hazardous decomposition products. If the spill or leak has not ignited, use water spray to disperse the vapors. Water spray may be used to flush spills away from fire and to dilute spills to nonflammable mixtures.

UNUSUAL FIRE AND EXPLOSION HAZARDS: Fatty alcohols are an NFPA Class IIIB combustible liquid.

6. ACCIDENTAL RELEASE MEASURES

- SMALL SPILLS:** Eliminate all sources of ignition. Evacuate the area. Contain the spill with dikes or absorbents to prevent migration and entry into sewers, streams, or drinking water supplies. Take up with dry chemical absorbents and place them into a suitable container for disposal.
- LARGE SPILLS:** Eliminate all sources of ignition. Evacuate the area. Contain spill to prevent migration and entry into sewers, streams, or drinking water supplies. Spills may be taken up with pump or vacuum and finished with dry chemical absorbents. May require excavation of contaminated soil.
- CAUTION:** Keep spills and cleaning runoff out of municipal sewers and open bodies of water.

7. HANDLING AND STORAGE

- HANDLING:** Avoid contact with eyes. Use only in a well-ventilated area. Wash thoroughly after handling. Avoid prolonged or repeated breathing of vapors. Avoid prolonged or repeated contact with skin.
- STORAGE:** Store away from sources of ignition and in a cool, dry place. Tanks: Carbon steel with effective moisture control, baked phenolic, epoxy or polyester, or metallic zinc in an inorganic binder. Special precautions: An Inert gas blanket and breathing system are needed to maintain color stability. Use dry inert gas having at least -40°F dew point.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

- THRESHOLD LIMIT VALUE:** No ACGIH TVL
- PERMISSIBLE EXPOSURE LIMIT:** No OSHA PEL
- SIGNS AND SYMPTOMS OF EXPOSURE:** In high concentrations, vapor may cause irritation of the nose and throat, dizziness, and headache. It should not be a hazard at ambient temperatures. Repeated or prolonged contact can cause reddening and scaling of the skin. May cause corneal inflammation. A chronic overexposure may cause depression of the central nervous system. Dermatitis
- MEDICAL CONDITIONS GENERALLY AGGRAVATED BY EXPOSURE:**
- PRIMARY ROUTES OF ENTRY:** Inhalation and dermal.
- ENGINEERING CONTROLS:** Use adequate exhaust ventilation to prevent inhalation of product vapors.
- RESPIRATORY PROTECTION:** NIOSH-approved organic air-purifying respirator, self-contained breathing apparatus, or air-supplied respirator, depending on concentration.
- EYE PROTECTION:** When contact with liquid is possible, use a face shield or splash goggles; otherwise, use safety glasses.
- SKIN PROTECTION:** Use full protective clothing, boots, and gloves when in contact with liquid.
