GENERAL INFORMATION

SUPER SPREAD[®] MSO is a 100% modified vegetable oil/surfactant blend that aids in penetration of a pesticide spray through the waxy cuticle. SUPER SPREAD MSO is a multifunctional spray concentrate with wetting and penetrating properties.

SUPER SPREAD MSO may be used in place of nonionic surfactants or crop oil concentrates in liquid spray mixtures. When used as directed, SUPER SPREAD MSO maximizes the activity of certain pesticides; therefore, care must be taken when treating sensitive crops during periods when plants are subjected to drought stress, high temperatures and high humidity.

DIRECTIONS FOR USE

Rates of SUPER SPREAD MSO may vary with the conditions of application. Always add SUPER SPREAD MSO last to the spray mixture while providing good agitation.

Aquatics: (NOT FOR AQUATIC USE IN WASHINGTON STATE)

SUPER SPREAD MSO may be used as an additive with aquatically labeled pesticides. The use rates for SUPER SPREAD MSO should follow the recommended adjuvant rate that is specified on the pesticide product label. If there is no recommended adjuvant rate on the pesticide label, SUPER SPREAD MSO should be used at the rate of 1 - 2 pints per acre in 5-30 gallons of water. For volumes greater than 30 gallons of water, do not exceed a rate of 1% volume/volume.

Defoliants: Use 1/2-2 pints per acre of SUPER SPREAD MSO in combination with defoliants.

Desiccants: Use 1-2 gallons per acre of SUPER SPREAD MSO with desiccants.

Fungicides: Use 1/2-2 pints per 100 gallons of spray mix or use ¼ to 1 pint per acre in concentrate sprays of 50 gallons or less.

Herbicides: Use 1-4 pints of SUPER SPREAD MSO per acre. The addition of a nitrogen fertilizer such as 28-32% nitrogen solution, ammonium sulfate or AMS replacement products, such as Bronc® Max may be required to improve control under extreme environmental conditions or to satisfy certain pesticide label requirements.

Insecticides: Use 1/2-2 pints per 100 gallons of spray mix or use ¼ - 1 pint per acre in concentrate sprays of 50 gallons or less.

For handgun or backpack applications, do not exceed a rate of 5% volume/volume.

For use with dormant oils and/or dormant sprays, use 1-2 quarts per 100 gallons of spray mix.

For pesticides/herbicides that permit use of an adjuvant at a higher rate, follow instructions on that pesticide/herbicide label. HOWEVER, DO NOT ADD THIS PRODUCT AT A RATE WHICH EXCEEDS 5% OF THE FINISHED SPRAY VOLUME, EXCEPT WHEN USED AS A DILUENT IN DORMANT, BASAL, SITE PREPARATION OR OTHER SIMILAR APPLICATIONS, PER LABEL INSTRUCTIONS.

USE RESTRICTIONS

Not for aquatic use in Washington state.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage and disposal.

STORAGE: Store in original container only and keep tightly sealed. Store in closed storage area. Avoid storage below 32° F.

PRODUCT DISPOSAL: Dispose of contents in accordance with all government regulations. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of federal law. Wastes resulting from the use of this product may be disposed of on-site or at an approved waste disposal facility.

CONTAINER HANDLING: Dispose of container in accordance with all government regulations. Triple rinse (or equivalent), then offer for recycling, if available, or reconditioning, if appropriate. Alternatively, puncture and dispose of the container in a sanitary landfill or other procedures approved by state and local authorities. The ACRC (Agricultural Container Recycling Council) operates a national recycling program. To contact your state or local ACRC recycler, visit the ACRC web page at www.acrecycle.org.
