### Directions and General Recommendations

#### RATE OF APPLICATION

The general recommended rate is 16 fl. oz. per acre. For heavy soils, two (2) applications of 16 fl. oz. per acre each is recommended.

#### TIME OF APPLICATION

**PENEX** can be applied at any time. However, the preferred times are in the fall after harvest or in early spring before planting.

#### METHOD OF APPLICATION

Mix the recommended quantity of **PENEX** with enough water to cover the entire acre and apply to the soil. **PENEX** can also be applied through irrigation. Incorporation of **PENEX** is not necessary.

#### LIMITED WARRANTY

Manufacturer or seller makes no warranty, whether expressed or implied, concerning the use of this product other than for the purposes indicated on the label. Neither manufacturer nor seller shall be liable for any injury or damage caused by this product due to misuse, mishandling, or any application not specifically described on the label.
