

Section 24(c) Special Local Need Label

FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF OREGON

Acelepryn® G

For Control of Japanese Beetles, a Quarantine Pest, in Commercial Nurseries As Part of the Oregon Department of Agriculture Japanese Beetle Eradication Program

EPA Reg. No. 100-1500
EPA SLN No. OR-170007

This label for Acelepryn G is valid until December 31, 2022 or until otherwise amended, withdrawn, cancelled, or suspended.

Active Ingredient:

Chlorantraniliprole¹

3-Bromo-N-[4-chloro-2-methyl-6-[(methylamino)carbonyl]phenyl]

-1-(3-chloro-2-pyridinyl)-1H-pyrazole-5-carboxamide0.2%

Other Ingredients:99.8%

Total:100.0%

KEEP OUT OF REACH OF CHILDREN

Environmental Hazards: This pesticide is toxic to aquatic invertebrates, oysters and shrimp. Do not apply directly to water. Drift and runoff may be hazardous to aquatic organisms in water adjacent to use sites.

Surface Water Advisory: This product may impact surface water quality due to runoff of rain water. This is especially true for poorly draining soils and soils with shallow ground water. This product is classified as having a high potential for reaching surface water via runoff for several months or more after application. A level, well-maintained vegetative buffer strip between areas to which this product is applied and surface water features such as ponds, streams, and springs will reduce the potential loading of chlorantraniliprole from runoff water and sediment. Runoff of this product will be reduced by avoiding applications when rainfall is forecasted to occur within 48 hours.

Ground Water Advisory: This chemical has properties and characteristics associated with chemicals detected in ground water. This chemical may leach into ground water if used in areas where soils are permeable, particularly where the water table is shallow.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

This FIFRA Section 24(c) Special Local Need (SLN) label and the federal label for Acelepryn G must be in the possession of the user at the time of pesticide application.

Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the EPA-registered label.

AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR Part 170. This standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on the label about personal protective equipment, restricted-entry interval, and notification to workers (as applicable).

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application.

For any requirements specific to your State or Tribe, consult the State or Tribal agency responsible for pesticide regulation.

Do not enter or allow worker entry into treated areas during the restricted-entry interval (REI) of 4 hours.

For early entry into treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, wear:

- Long-sleeved shirt and long pants
- Shoes plus socks

Table 1. For Use in Commercial Ornamental Nurseries

Target Pest	Use Rate	Application Timing	Use Directions
White grubs of Japanese beetles	50 to 100 lbs per acre	Application timing may be based on historical monitoring of the site, previous records or experiences, current season adult trapping, or other methods.	Apply as a broadcast application. Irrigate after application or allow rainfall to move the product into the soil.

Restrictions:

- Do not apply more than 100 lbs of product per acre in a single application.
- Do not apply more than 250 lbs of product per acre per year.
- Wait a minimum of 7 days to retreat.
