

Section 2(ee) Recommendation

Date: June 11, 2018

Product: Acuron® Herbicide, EPA Reg. No. 100-1466
Plus
Trivapro® Fungicide, EPA Reg. No. 100-1613

Use: Tank Mixture of Acuron Herbicide Plus Trivapro Fungicide for Early Application on Field Corn

State: Texas

Directions for Use

- **It is a violation of Federal law to use this product in a manner inconsistent with its labeling.**
- **The user must refer to the federally approved labels for the above noted product and read and follow all directions for use, restrictions, and precautions.**
- **The user should have this recommendation in its possession at the time of use.**
- **This recommendation for use of this product is permitted under Section 2(ee) of FIFRA and has not been submitted to or been approved by EPA.**

For early season post emergence use on field corn: Apply a tank mixture of Acuron Herbicide up to 2.0 qt/A with Trivapro Fungicide at 13.7 oz/A between corn emergence and 12" corn height

Solo glyphosate products labeled for post emergence use on field corn may also be tank mixed with Acuron Herbicide + Trivapro Fungicide.

Maximum Use Rate:

- Do not apply more than 3.0 qt of Acuron Herbicide per acre per year.
- Do not apply more than 47 fl oz/A/year of Trivapro Fungicide to corn (except sweet)

Syngenta is not responsible for any compatibility or crop injury issues that may arise from the use of other additives not labeled for use with Acuron Flexi alone or with glyphosate and Trivapro Fungicide.

Shake the Trivapro Fungicide container well before using. Follow all directions for use, restrictions and precautions given on the Acuron Flexi and Trivapro Fungicide labels.
