Baythroid® XL

EPA Reg. No. 264-840

For Use on Pome Fruit

## PRODUCT BULLETIN

### RESTRICTED USE PESTICIDE

Due to Toxicity to Fish and Aquatic Organisms

For retail sale to and use only by Certified Applicators or persons under their direct supervision and only for those uses covered by the Certified Applicator's certification.

### FOR DISTRIBUTION AND USE ONLY IN THE STATES OF OREGON AND WASHINGTON

**FIFRA Section 2(ee) Recommendation:** This recommendation is made as permitted under FIFRA Section 2(ee) and has not been submitted to or accepted by the U.S. Environmental Protection Agency. It is a violation of federal law to use this product in a manner inconsistent with its label. This product bulletin must be in the possession of the user at the time of pesticide application. Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the EPA registered label.

### DIRECTIONS FOR USE

It is a violation of Federal law to use this product inconsistent with its labeling.

#### POME FRUIT

Includes all members of Crop Group 11 such as, but not limited to:

Apple, Crabapple, Loquat, Mayhaw, Pear, Oriental pear, Quince

Pest Controlled	Rate fluid ounces/Acre	Rate lbs AI/Acre

#### Notes

Pre-Harvest Interval (PHI): 7 days.

Maximum BAYTHROID XL allowed per 14-day interval: 2.8 fluid ounces/A (0.022 lb AI/Acre).

Maximum BAYTHROID XL allowed per crop season: 2.8 fluid ounces/A (0.022 lb AI/Acre).

Minimum application volume (water): 100 GPA – ground application, 25 GPA – aerial application.

#### Resistance:

Pyrethroid resistance in certain populations of pear psylla has been documented. Because the development of resistance cannot be predicted, the use of this product should conform to resistance management strategies established for the use area. Consult your local or State agricultural authorities for details. If resistance to this product develops in your area, this product alone may not continue to provide adequate control of resistant pear psylla. If poor performance cannot be attributed to improper application, extreme weather conditions, etc., a resistant strain may be present. If you experience difficulty with control and resistance is a reasonable cause, immediately consult your local company representative or agricultural advisor/state Extension agent for the best alternative method of control in your area. Consult your state Cooperative Extension Service agent or agricultural advisor for insect resistance management strategies and recommended insect control methods in your area.
