APPLICATION INSTRUCTIONS

Foliar apply Monty's Agrihance-V anytime during vegetative growth stage at a rate of 1 to 2 quarts diluted in 10-20 gallons of water per acre. Apply on Corn: V4-V6; Soybeans: R1-R3; Wheat: any growth stage. All Agrihance products may be applied through irrigation or drip lines. Consult your Monty's dealer for details.

With some crops it may be beneficial to apply micro-nutrients with Monty's Agrihance-V. Consult a certified crop advisor or other qualified individual or institution to determine the types and levels of micro-nutrients appropriate for your farm and crops.

Monty's Agrihance-V is a liquid plant food that is recommended as a supplement to your current fertilizer program and is not recommended to replace the nutrients typically added to the soil. We suggest taking a soil test and have a qualified independent lab analyze the samples to determine nutrient levels in your soils and then follow recommended applications to ensure proper nutritional levels.

Can be tank-mixed with most pesticides.

STORAGE AND HANDLING

Keep container closed when not in use. This product contains organic materials which may settle and should be shaken or stirred if stored. Refer to the MSDS for other safety and handling information.

Information regarding the contents and levels of metals in this product is available on the Internet at: <http://www.aapfco.org/metals.htm>

USE OF MONTY'S PLANT FOODS WITH FARM CHEMICALS

Monty's products are designed specifically for fertility enhancement purposes. Monty's products are compatible with many farm chemicals and may improve the efficacy of some pesticide applications, but Monty's does not guarantee it to do so. When tank mixing any Monty's products with other farm chemicals, always read and follow the label directions of the chemical(s) you are considering. Monty's suggests administering a jar test and/or a strip test before adding Monty's to your tank mix. When mixing with other farm chemicals, it is suggested to tank mix Monty's only after diluting the chemical according to label directions. Knowing the chemical's "mode of action" (block photosynthesis) or metal content (copper based) will help determine the compatibility of Monty's. Once mixed or diluted, product should be used within 48 hours. Please call 800-978-6342 with any questions.

LIMITED WARRANTY

For a period of 12 months from the date of purchase, Monty's warrants that this product meets its manufacturing specifications. If it does not, Monty's will, at its option, replace the product or refund the purchase price. In no event shall Monty's be liable for special, incidental or consequential damages or for damages in the nature of penalties. Monty's shall not be liable in any way for claims resulting from any use of this product which is not in strict accordance with all directions, cautions and warnings on the label or labels.
