

FOR LIQUID FERTILIZER SOLUTIONS

Active Ingredients:

Poly amino acid (L-aspartic acid), sodium salt.....	38.2%
Inert Ingredients.....	61.8%
Total	100.00%

**FOR AGRICULTURAL USE
(THIS IS A NON PLANT-FOOD PRODUCT)**

**CAUTION
KEEP OUT OF REACH OF CHILDREN
PETS AND LIVESTOCK**

P Max LFS is a phosphate fertilizer additive. When mixed with liquid fertilizers containing phosphate, **P Max LFS** increases phosphate efficiency and plant uptake. **P Max LFS** is not a substitute for recommended phosphate fertilization based on crop removal rates or yield goals.

DIRECTIONS FOR USE

P Max LFS easily mixes with Pre-Plant, Starter or Side-Dress liquid/suspension fertilizer solutions. It is however, recommended that, due to the potential variability in some liquid/suspension fertilizer solutions, compatibility is checked by mixing small quantities of each at the appropriate ratio of fertilizer with **P Max LFS**. If coagulation occurs or sediments are formed – **DO NOT USE THAT FERTILIZER AS A CARRIER**. Do not mix with acid solutions with a pH below 4.

Use Rate** – 1.0% v/v
(1 gallon/100 gallons of liquid/suspension fertilizer solution).

** Use 1.5% v/v (1.5 gallon/100 gallons of liquid/suspension fertilizer solution) when applied to soils with high levels of any of the following - Ca, Al, Fe or Mg.

Mixing Instructions:

Fill tank with one-half the desired amount of liquid fertilizer solution. Add the required amount of **P Max LFS**. Add the remaining amount of the liquid fertilizer solution while allowing the agitation to thoroughly mix the **P Max LFS** into the liquid/suspension fertilizer solution.

Net Weight
10.2 lbs./Gal
