Clean Amine

EPA Reg. No. 34704-120

2(ee) Recommendation[†]

Control of Additional Aquatic Weed in New Hampshire

ATTENTION

- [†]This recommendation is made as permitted under FIFRA Section 2(ee) and has not been submitted to or approved by the EPA or state lead pesticide agency.
- Read and follow all applicable directions for use, precautions and limitations on the federally registered label attached to the product container.

Additional submersed aquatic weed controlled within existing rate range of the federally registered product label for Clean Amine:

Submersed Weed	
Additional Target Pest	Instructions
Variable Water Milfoil (<i>myriophyllum</i> <i>heterophyllum</i>)	Follow the instructions for Subsurface aquatic application section of the Federally approved label. Apply at the rates specified below.

Restrictions:

- The user must refer to the federally approved **Clean Amine** label and read and follow all applicable directions for use, restrictions, and precautions.
- Do not apply within 21 days of previous application.
- When treating moving bodies of water, applications must be made while traveling upstream to prevent concentration of 2,4-D downstream from the application.
- Coordination and approval of local and state authorities may be required, either by letter of agreement or issuance of special permits for such use.
- **Treated Water Use Instructions on the Federally Approved Label** must be followed.
- Do not apply more than 11.55 quarts (10.8 pounds acid equivalent) per acre-foot per application.
- Do not make more than 2 applications per season

Table 1. Amount of 2,4-D to Apply for a Target Subsurface Concentration

Average Depth ft	For Difficult Conditions*	
	quarts Of this product per acre	pounds acid equivalent per acre
1	11.55	10.8
2	23.10	21.6
3	34.62	32.4
4	46.20	43.2

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

This recommendation should be in the possession of the user at the time of pesticide application.
