Keep spill out of open bodies of water and municipal sewers unless allowed under NPDES (National Pollutant Discharge Elimination System) permit.

6.3 Methods of Containment

Small Release:

Soak up with inert absorbent material (e.g. sand, silica gel, universal binder, sawdust).

Large Release:

Shut off release if safe to do so. Dike spill area with earth, sand or other inert absorbents to prevent runoff into drains, sewers, or waterways.

6.4 Method for Cleanup:

Small Release:

After spill is contained sweep up and shovel into containers for disposal. Care should be taken to avoid causing dust of dried material to become airborne. Wash spill area with soap and water, repeat until area is clean.

Large Release:

Recover as much of the spilled product using portable pump and hoses. Treat remaining material as a small release (above).
