DIMETHOATE 400
EPA Reg. No. 34704-207

SUPPLEMENTAL LABELING

FOR ORNAMENTAL PLANTS GROWN IN NURSERIES ONLY

DIMETHOATE 400 may be used to control many sucking, piercing and chewing insects, including aphids, psyllids, thrips, leaf miners, scales, leafhoppers, and mites that attack valuable ornamental plantings.

DIMETHOATE 400 may be used on a wide variety of nursery plants to control insects. Do not use on ornamental plants that are not listed on this label unless personal experience has shown DIMETHOATE 400 is not phytotoxic to your plants. A small test area should always be sprayed first before general use. Do not use on an ornamental stock plants grown as a source of propagation material, such as cuttings, layers, root stocks or scions for grafting or budding.

This label must be in the possession of the applicator at the time of application.

All precautions and restrictions on the DIMETHOATE 400 label must be followed.

Do not use in spray mixtures containing oil. Do not use on plants growing in greenhouses.
