# CAL-PROTECT 6%

## *A Formulation for the Correction of Calcium Deficiencies in Crops*

### GENERAL INFORMATION

CAL-PROTECT 6% is formulated for field, vegetable, row, fruit, tree, vine, ornamental and turf crops.

CAL-PROTECT 6% may be applied through drip systems, aircraft, or via ground sprayers (high-volume or low-volume).

CAL-PROTECT 6% may be applied alone or with fertilizers or pesticides. It can be applied either to the plant foliage or to the soil.

CAL-PROTECT 6% is compatible with most pesticides and fertilizers. However, a compatibility test is recommended if the desired combination has not been used in the past. Do not use with phosphate fertilizers, lime, lime sulfur or other highly basic products.

### PRECAUTIONARY STATEMENTS

**CAUTION: KEEP OUT OF REACH OF CHILDREN**  
Harmful if swallowed. May cause eye and skin irritation. In case of contact, immediately flush eyes or skin with plenty of water and continue flushing for 15 minutes. If irritation persists, seek medical attention.

### STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal. Follow proper procedures for the disposal of spray solutions. Triple rinse and dispose of empty container according to approved local practices.

### GUARANTEED ANALYSIS

Calcium (Ca).....6.0%  
Derived from Calcium Lignosulfonates.

Weight per gal.: 9.98 lbs. At 68 F

### CONDITIONS OF SALE

Seller warrants that the product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use: Weather, crop conditions, timing and methods of applications, mixtures with other chemicals not specifically recommended, and other influencing factors in the use of this product are beyond the control of the seller. Buyer assumes all risks of use, storage, or handling of this material not in strict accordance with directions given herewith.

Net Wt.

### All Crops:

#### Foliar Application:

Apply 1 to 3 quarts/ acre as needed on a 10 - 14 day schedule in adequate water for optimal coverage.  
When rates of over 1 quart are required, split applications of 1 quart or less are recommended.

Avoid foliar applications of CAL-PROTECT 6% when plants are under stress due to lack of moisture.

#### Soil Application:

For fertilizer maintenance apply 1-3 quarts per acre  
For mild deficiency apply 2 quarts -1 gal per acre  
For high deficiency apply 1-3 gal per acre.

#### Aerial Application:

Apply 1 to 3 quarts per 5 to 10 gallons of water per acre. A concentration of 1 quart per gallon of spray may be used.

#### Conventional (Dilute) Application:

Apply the suggested rate of this product in enough water for proper coverage.

#### Concentrate Application:

Use up to 2 quarts of this product in a minimum of 25 gallons of water per acre.

**Drip Irrigation Application:** Apply the suggested rate of this product in multiple applications 10 - 14 days apart throughout the growing season of the crop.
