PRODUCT INFORMATION

V-DRIFT is an easy-to-use, highly effective drift control agent and deposition aid, for use in ground aerial spraying operations. *V-DRIFT* is compatible with most water-soluble and wettable powder pesticides, desiccants and cotton defoliants.

DIRECTIONS FOR USE

1. Select correct rate from the rate chart below.
2. Fill mix tank with water. Start to agitate.
3. If additional surfactant or other spray adjuvants are used, they may be added before *V-DRIFT*.
4. Add *V-DRIFT*.
5. Add pesticide.
6. Continue to agitate mix tank at least 2 minutes before spraying.

NOTE: The degree of drift hazard varies with the type of pesticide, application conditions, and vegetation near the sprayed area. Remember, pesticide drift is no accident. *V-DRIFT* will retard, but not totally eliminate the drift.
