DIRECTIONS FOR USE:

For use in a balanced fertility program for all crops requiring manganese. User should seek the advice of a certified crop advisor or trained agronomist. For specific crop recommendations in your area, consult your state's recommendations.

MAX-IN[®] MN FOUR HW contains CornSorb[™] Technology which assists in absorption and movement of nutrients in the plant. MAX-IN[®] MN FOUR HW is not to be used as a replacement for any surfactant in recommendations tank-mixed with herbicides. The use of ammonium sulfate is always recommended when tank-mixed with glyphosate based products and other herbicides.

MAX-IN[®] MN FOUR HW is specifically designed for use on soybeans in conjunction with glyphosate products. However, this product can be used on other crops where the addition of manganese would be beneficial. For use on crops other than soybeans, apply according to directions of your regional Winfield Plant Nutrition Specialist or local agricultural professional to crops. It is compatible with most agricultural pesticides. However, if local information is not available, a jar test for compatibility should be conducted prior to large scale mixing.

WINFIELD[™]

A number of variables influence the rate of application necessary to prevent or correct a specific deficiency. For best results, follow good agronomic practices and tissue test. For specific recommendations for crops in your area, consult your state's recommendations. An ammonium sulfate source is recommended with herbicides when ammonium sulfate or a nitrogen source is recommended.

General Information

MAX-IN® MN FOUR HW is a special formulation of liquid manganese with chelating agents plus CornSorb™ technology which can be applied with glyphosate as a foliar application on agricultural crops where manganese deficiencies may exist.
