SECTION 4. FIRST AID MEASURES

If inhaled: If breathed in, move person into fresh air. Give oxygen or artificial respiration if needed. In case of bluish discolouration (lips, ear lobes, fingernails), give oxygen as quickly as possible. Obtain medical attention.

In case of skin contact: If on clothes, remove clothes. Wash off immediately with plenty of water for at least 15 minutes. If skin irritation occurs, seek medical advice/attention. Wash contaminated clothing before re-use. Destroy contaminated shoes.

In case of eye contact: In case of eye contact, remove contact lens and rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes. If symptoms persist, call a physician.

If swallowed: Do NOT induce vomiting. Give small amounts of water to drink. Call a physician or poison control centre immediately. Never give anything by mouth to an unconscious person.

Most important symptoms and effects, both acute and delayed: irritant effects. Symptoms may be delayed. Causes eye irritation. May cause cancer.

Notes to physician: The first aid procedure should be established in consultation with the doctor responsible for industrial medicine.

SECTION 5. FIREFIGHTING MEASURES

Unsuitable extinguishing media: Water spray jet.
Specific hazards during fire-fighting: Burning produces noxious and toxic fumes.

Specific extinguishing methods: Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.

Further information: Fight fire with normal precautions from a reasonable distance. Keep away from fire, sparks and heated surfaces. Use water spray to cool unopened containers. Prevent fire extinguishing water from contaminating surface water or the ground water system.

Special protective equipment for firefighters: Body covering protective clothing, full "turn-out" gear. Self-contained breathing apparatus (EN 133)

SECTION 6. ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures: Evacuate personnel to safe areas. Wear suitable protective clothing, gloves and eye/face protection. Avoid contact with skin and eyes. Ventilate the area. Keep in properly labelled containers. Dispose of rinse water as waste water.

Environmental precautions: Toxic to aquatic life. Do not allow uncontrolled discharge of product into the environment. Do not flush into surface water or sanitary sewer system.

Methods and materials for containment and cleaning up: Soak up with inert absorbent material (e.g. sand, silica gel, acid binder, universal binder, sawdust). Shovel into suitable container for disposal. Large spills should be collected mechanically (remove by pumping) for disposal. Ventilate the area.

SECTION 7. HANDLING AND STORAGE

Advice on safe handling: Handle and open container with care. Protect from contamination. Use only in well-ventilated areas. In case of insufficient ventilation, wear suitable respiratory equipment. Avoid inhalation, ingestion and contact with skin and eyes. Wear suitable protective clothing, gloves and eye/face protection. Wash thoroughly after handling. Keep container closed when not in use.

Conditions for safe storage: Keep containers tightly closed in a dry, cool and well-ventilated place. Keep only in the original container.

### Engineering measures

Use mechanical ventilation for general area control. Ensure that extracted air cannot be returned to the workplace through the ventilation system. Ensure that eyewash stations and safety showers are close to the workstation location.

### Personal protective equipment

#### Respiratory protection

In case of insufficient ventilation, wear suitable respiratory equipment. When workers are facing concentrations above the exposure limit they must use appropriate certified respirators. The filter class for the respirator must be suitable for the maximum expected contaminant concentration (gas/vapour/aerosol/particulates) that may arise when handling the product. If this concentration is exceeded, self-contained breathing apparatus must be used.

#### Hand protection

Chemical resistant protective gloves
Eye protection: Safety glasses with side-shields or safety goggles

Skin and body protection:
- Long sleeved clothing
- Remove and wash contaminated clothing before re-use.
- Discard contaminated shoes.
- To protect against splashes from pouring:
  - Rubber or plastic boots
  - Rubber or plastic apron

Hygiene measures:
- Handle in accordance with good industrial hygiene and safety practice.
- Wear suitable gloves and eye/face protection.
- Avoid contact with skin, eyes and clothing.
- Do not inhale aerosol.
- Ensure adequate ventilation, especially in confined areas.
- When using do not eat, drink or smoke.
- Wash thoroughly after handling.
- Keep working clothes separately.
- Remove and wash contaminated clothing before re-use.
- Contaminated work clothing should not be allowed out of the workplace.

This chemical is a pesticide product registered by the United States Environmental Protection Agency and is subject to certain labeling requirements under federal pesticide law. These requirements differ from the classification criteria and hazard information required for safety data sheets (SDS), and for workplace labels of non-pesticide chemicals. The pesticide label also includes other important information, including directions for use.

The hazard information required on the pesticide label is reproduced below.

**CAUTION**

This pesticide is toxic to terrestrial juvenile insects and aquatic invertebrates/mollusks/insects. Do not apply directly to water or to areas where surface water is present or to intertidal areas below the mean high water mark. Drift and runoff may be hazardous to aquatic organisms in water adjacent to treated areas. Do not contaminate water when disposing of equipment washwaters or rinsate.

Bees and other insect pollinators can be exposed to this pesticide from: • Direct contact during foliar applications, or contact with residues on plant surfaces after foliar applications • Ingestion of residues in nectar and pollen when the pesticide is applied as a soil or foliar application.

When Using This Product Take Steps To: • Minimize exposure of this product to bees and other insect pollinators when they are foraging on pollinator attractive plants around the application site. • Minimize drift of this product on to beehives or to off-site pollinator attractive habitat. Drift of this product onto beehives or off-site to pollinator attractive habitat can result in bee kills.
