

Liquid Iron / Zinc Sulfate

SulFeGro

GUARANTEED ANALYSIS:

Sulfur (S)	3.0%
Iron (Fe).....	5.0%
Zinc (Zn)	2.0%

Derived from Ferrous Sulfate and Zinc Sulfate.

Weight per gallon: 10.3 lbs. per gallon @ 68°F.

SHAKE WELL BEFORE USING STORE ABOVE 32°F

KEEP OUT OF REACH OF CHILDREN
DANGER
CAUSES SERIOUS EYE DAMAGE.

PRECAUTIONARY STATEMENTS:

PERSONAL PROTECTIVE EQUIPMENT: Wear eye protection / face protection.

FIRST AID: Immediately call a POISON CENTER, a doctor. **IF IN EYES** Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

DISPOSAL Dispose of contents / container in accordance with Federal, state, and local regulations.

GENERAL INFORMATION

PHT SulFeGro contains soluble micronutrients which are immediately available to the plant and which assist in the formation of chlorophyll, photosynthesis and growth in plants. It is a valuable source of iron, zinc and sulfur that provide essential micronutrients, especially those grown in alkaline soils. Caution should be taken when applying to Iron and Zinc deficient acidic soils. When applying to acidic soils use the lower rates. PHT SulFeGro supplies acidity, which produces a microzone with a lower pH (higher acidity) which helps mobilize iron and other acid soluble nutrients.

PHT SulFeGro contains concentrated iron, which will stain clothing, masonry and sprinkler irrigation systems. Rust stained clothing should be washed separately from other clothing. If spilled on masonry, wash with water to reduce staining. Prolonged contact with PHT SulFeGro when applied through sprinkler irrigation systems may oxidize unprotected metal and stain equipment. Contact a chemical consultant for specific instructions to remove stains.

DIRECTIONS FOR USE

PHT SulFeGro is compatible with nitrogen sources such as UAN 32, Liquid Urea and Ammonium Sulfate. Do not combine with Ammonium Nitrate.

Rates of application will vary depending upon the severity of the deficiency, climate, and soil type. Consult your crop advisor, agronomist, or university crop extension publication for advice in selecting the rate to best fit local conditions.

SOIL APPLICATION: Apply 10 to 75 gallons per acre. PHT SulFeGro may be applied directly from the container or diluted with water to the desired strength. When applied to existing crops, such as alfalfa or grass, irrigate immediately for best results.

INDIVIDUAL TREE APPLICATIONS: Apply 1/4 cup per hole. Place in holes 6 to 8 inches deep and 1 foot apart around the drip line of the tree. Do not exceed 1/4 cup per tree for young trees and 1/2 gallon per tree for older, mature trees.

FOLIAR APPLICATIONS: Apply 1 to 15 gallons per acre. On crops with a high degree of yellowing, such as turf or grains, the higher rate may be needed for a quick response. Most field crops (broadleaf) will require from 4 to 10 gallons per acre. Foliar application on fruit trees may cause spotting of fruit and is not recommended.

NOTICE: Before using this product, read the entire Caution statements, Conditions of Sale and Warranty and Directions for Use instructions. If the Conditions of Sale and Warranty are not acceptable, return the product unopened within thirty days of purchase to the place of purchase.

Warning: This product contains a chemical known to the State of California to cause cancer, birth defects or other reproductive harm. Proposition 65, the Safe Drinking Water and Toxic Enforcement Act of 1986, requires notification of potential exposure to substances identified by the State of California as causing cancer, birth defects or other reproductive harm.

Information regarding the contents and levels of metals in this product is available on the Internet at <http://www.regulatory-info-jr.com>

CONDITIONS OF SALE AND WARRANTY: J.R. Simplot Company warrants that the product conforms to its chemical description and is reasonably fit for the purpose stated on the label only when used in accordance with label directions under normal conditions of use. J.R. SIMPLOT COMPANY MAKES NO OTHER EXPRESS OR IMPLIED WARRANTIES EITHER OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE. Handling, storage and use of the product by Buyer or User are beyond the control of J.R. Simplot Company and Seller. Risks such as crop injury, ineffectiveness or other unintended consequences resulting from, but not limited to, weather or soil conditions, presence of other materials, disease, pest, drift to other crops or property or failure to follow label directions will be assumed by the Buyer or User. In no case will J.R. Simplot Company or Seller be held liable for consequential, special or indirect damages resulting from the handling, storage or use of this product.
