

PRODUCT BULLETIN
2(ee) Recommendation

**THIS PRODUCT BULLETIN CONTAINS
NEW OR ADDITIONAL
DIRECTIONS FOR USE
WHICH ARE RECOMMENDED BY
INNICTIS CROP CARE LLC
UNDER FIFRA SECTION 2(ee)**

EPA Reg. No. 89168-11-89391

FIFRA Section 2(ee) Recommendation: This recommendation is made as permitted under FIFRA Section 2(ee) and has not been submitted to or accepted by the U.S. Environmental Protection Agency. It is a violation of federal law to use this product in a manner inconsistent with its label. This product bulletin must be in the possession of the user at the time of pesticide application. Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the EPA registered label.

DIRECTIONS FOR USE - It is a violation of Federal law to use this product inconsistent with its labeling.

TANK MIX ADDITIVES

When the label call for the use of a tank mix additive, a Crop Oil Concentrate or Non-Ionic Surfactant, either one may be used as long as they meet the following criteria.

Acceptable crop oil concentrates would be those that contain a minimum of 80% oils and 15% emulsifier. A crop oil concentrate must contain either a petroleum or vegetable oil base and must meet all the following criteria: be non-phytotoxic, contain only EPA-exempt ingredients, provide good mixing quality, and be successful in local experience. Highly refined vegetable oils have proven more satisfactory than unrefined vegetable oils.

Always use a crop oil concentrate at 1.0 qt./A by ground or 1% v/v (but not less than 1 pt./A) in the finished spray volume by air

Add a non-ionic surfactant containing at least 80% Principal Functioning Agents at the rate of 1 pt. per 50 gals. (0.25% v/v).

Always refer to the complete product label for full use directions and precautionary language.
