Approved Surfactants – League® Herbicide

League Herbicide is an unprecedented early season lead-off play against tough broadleaf, aquatic and sedge weeds. It offers solid preemergence residual control of yield-robbing weeds and will fit your herbicide program lineup.

- *League* strikes weeds as they emerge providing unique residual control and also offers postemergence control for best fit in your weed program
- **Controls tough rice weeds including:** jointvetches, hemp sesbania, Texasweed, morningglory, flat sedge, eclipta, yellow nutsedge and more
- Fit for use on conventional or Clearfield® rice

Triple Play	MFA	128	12.8
Volare™ + UAN	MFA	64 + 128	6.4 + 12.8

The addition of 2% volume/volume 32 or 28% UAN (Urea-ammonium nitrate) to one of the above listed surfactants (except Dyne-A-Pak, Phase II, Soysurf Xtra and Triple Play, which already contain UAN) is recommended and may enhance the activity of *League* when applied under some conditions. The addition of 32 or 28% UAN (Urea-ammonium nitrate) at 1% v/v to AirForce, Persist and Volare adjuvants is required when used with *League* Herbicide. UAN is NOT a substitute for an approved adjuvant, but rather should be used in combination with one of the approved adjuvants.
