Milestone® VM

EPA Reg. No. 62719-537

2(ee) Recommendation †

For Distribution and Use in the States of Arizona, California, Idaho, Oregon, and Washington

Control Of Broadleaf Weeds With Preemergent Applications On Non-Cropland Areas Including Industrial Sites, And Rights-Of-Way (Such As Roadsides, Electric Utility And Communication Transmission Lines, Pipelines, And Railroads)

ATTENTION

- [†]This recommendation is made as permitted under FIFRA 2(ee) and has not been reviewed or approved by the EPA.
- This recommendation must be in the possession of the user at the time of application.
- Read the label affixed to the container for Milestone® VM before applying. Carefully follow all precautionary statements and applicable use directions.
- Use of Milestone VM as described this Section 2(ee) recommendation is subject to all use precautions and limitations imposed by the label affixed to the product container.

Directions for Use

Applications made during periods of intense rainfall, to soils saturated with water, surfaces paved with materials such as asphalt or concrete, or soils through which rainfall will not readily penetrate may result in runoff and movement of Milestone VM. Injury to crops may result if treated soil is washed, or moved onto land used to produce crops. Exposure to Milestone VM may injure or kill susceptible crops and other plants, such as grapes, soybeans, tobacco, sensitive ornamentals. Do not treat frozen soil where runoff could damage sensitive plants.

Milestone VM provides preemergent and post emergent control of susceptible weeds. See the Milestone VM label for directions on use for post emergent applications.

Preemergent applications of Milestone VM can prevent weed germination and emergence. Apply Milestone VM as a preemergence spray before or during the rainy season when weeds are actively germinating. Control will depend upon species susceptibility, application timing, and environmental conditions, such as precipitation, following application.

For preemergent applications apply Milestone VM at 7 fl oz per acre. Best results for total vegetation control are obtained if Milestone VM is tank mixed with other herbicides to broaden the weed spectrum by controlling grasses. If grasses and tolerant broadleaf weeds are present on the site then tank mixtures with other herbicides, such as Accord XRT II, Accord Concentrate, Rodeo, Dimension 2EW, Oust XP, Payload, and diuron are recommended.

In addition to the plants listed on the Milestone VM label, the following weeds are controlled when Milestone VM is applied preemergence.

Common Name	Scientific Name	Life Cycle	Plant Family
bedstraw	Galium spp.	perennial	Rubiaceae
chamomile, scentless	Matricaria inodora	annual	Asteraceae
clover	Trifolium spp.	perennial	Fabaceae
fleabane, flax-leaf	Conyza bonariensis	annual	Asteraceae
horseweed (marestail)	Conyza canadensis	annual	Asteraceae
knapweeds	Centaurea spp.	biennial/ perennial	Asteraceae
mayweed, scentless	Tripleurospermum perforata	annual	Asteraceae
mayweed, stinking	Anthemis cotula	annual	Asteraceae
medic, black	Medicago lupulina	perennial	Fabaceae
oxtongue, bristly	Picris echioides	biennial	Asteraceae
sowthistle, perennial	Sonchus arvensis	perennial	Asteraceae
star-thistle, Malta	Centaurea melitensis	annual	Asteraceae
starthistle, purple	Centaurea calcitrapa	biennial	Asteraceae
star thistle, yellow	Centaurea solstitialis	annual	Asteraceae
sunflower, common	Helianthus annuus	annual	Asteraceae
teasel	Dipsacus spp.	biennial	Dipsacaceae
thistle, artichoke	Cynara cardunculus	perennial	Asteracea
thistle, bull	Cirsium vulgare	biennial	Asteraceae
thistle, woolly distaff	Carthamus lanatus	annual	Asteraceae
thistle, musk	Carduus nutans	biennial	Asteraceae
thistle, plumeless	Carduus acanthoides	biennial	Asteraceae
thistle, Scotch	Onopordum acanthium	biennial	Asteracea
thistle, Italian	Carduus pycnocephalus	annual	Asteraceae
thistle, Russian	Salsola tragus	annual	Chenopodiaceae
