

PRODUCT INFORMATION BULLETIN

RESTRICTED USE PESTICIDE

Due to toxicity to aquatic invertebrate animals. For retail sale to and use only by Certified Applicators, or persons under their direct supervision, and only for those uses covered by the Certified Applicator's certification.

DIMILIN 2L INSECT GROWTH REGULATOR EPA REG. NO. 400-461

FIFRA 2(ee) RECOMMENDATION FOR USE WITHIN THE STATE OF CALIFORNIA.

Use of Dimilin 2L for controlling katydids and pear slugs (sawflies) on California pear.

For katydids and pear slugs, apply 8 ounces of DIMILIN 2L per acre when early nymphs/instars are first noticed. DIMILIN 2L must be ingested and nymphs/instars must molt before populations are reduced. DIMILIN 2L will not control katydids and pear slugs once in the adult insect stage. Repeat application for subsequent generations.

Do not apply more than 4 applications per year. Allow at least 14 days between successive applications; there is a 14-day pre-harvest interval. Do not use oil in tank mix in late season treatments.

Read and follow all applicable directions, restrictions, and precautions on the EPA registered label.

This recommendation must be in the possession of the user at the time of pesticide application.
