DESCRIPTION

ROTORIP® this product is an auxiliary soil and plant substance that aids in restoring soil productivity by improving soil tilth, gas exchange and proper water utility. ROTORIP® is also an effective soil remediation tool for salt and sodium affected soils. It can also be used to increase soil water infiltration (decreased runoff), rapid water recharge of soil profile, uniform wetting, and increased soil moisture content. ROTORIP® also facilitates the removal of salts and sodium when followed by excess water applications to achieve soil leaching. ROTORIP® may be applied in-season to growing crops.
