CROP	ADJUVANT RECOMMENDATIONS
Almonds and Walnuts	The use of an adjuvant is required for all applications of Athena made to almonds and walnuts. The use of summer spray oil (not dormant oil) on almonds and walnuts is recommended. When an adjuvant such as a non-ionic surfactant is to be used with this product, FMC recommends Chemical Producers and Distributors Associations certified. Adjuvants improve wetting of foliage, penetrating of the leaf cuticle and smoothing out spray deposition.
DIRECTIONS FOR USE: See the Federal Label of ATHENA Insecticide/Miticide for application methods, rates, and pests controlled. Follow the Directions for Use, Precautions and Restrictions on the adjuvant product labels and in official spray guides.	
RESTRICTIONS: Do not use a binder or sticker-type adjuvant.
