

Advanced Coating[®] Zn

For use on field corn, popcorn, sweet corn, and seed corn

GUARANTEED ANALYSIS

Zinc (Zn).....50.00%

Derived from Zinc Oxide.

**STORE ABOVE 32°F
AGITATE WELL BEFORE USE**

KEEP OUT OF REACH OF CHILDREN

WARNING

Causes eye irritation. May cause respiratory irritation.

PRECAUTIONARY STATEMENTS

Avoid breathing mist, spray or fumes. Wash hands thoroughly after handling. Use only outdoors in a well-ventilated area. Store in a well-ventilated and secured place. Keep container tightly closed. Dispose of contents/container in accordance with Federal, state and local regulations.

FIRST AID

IF IN EYES: Rinse cautiously with water for 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists, seek medical attention.

IF INHALED: Remove person to fresh air and keep comfortable for breathing. Call a poison control center or doctor for treatment advice if you feel unwell.

For Emergency, Spill, Leak, Fire, Exposure, or Accident, Call CHEMTREC: 1-800-424-9300.

GENERAL INFORMATION

Advanced Coating[®] Zn is a seed applied nutritional source of zinc. **Advanced Coating Zn** is recommended as an additional zinc application method and is not intended to replace other zinc applications.

NOTE: *A number of variables influence the rate of application necessary to correct a specific deficiency. For best results, follow good agronomic practices, soil test and, if necessary, use tissue analysis. For more information, contact your local agricultural specialist.*

Advanced Coating Zn applied alone improves plantability, improves seed coverage and appearance and reduces dust-off of other seed treatments during and after seed treatment applications.

RECOMMENDED RATES AND APPLICATION AS SEED TREATMENT

Advanced Coating Zn is a liquid formulation intended for application through commercial seed treaters.

Advanced Coating Zn can be mixed with any seed treatments containing insecticides or fungicides provided these products are miscible with water. However, a jar test before using will help determine if they are compatible.

Apply **Advanced Coating Zn** liquid at the rate of 4 to 8 fluid ounces per 100 pounds of seed. This rate will result in the application of 2.088-4.176 dry ounces of actual zinc per 100 pounds of seed.

Apply **Advanced Coating Zn** with a polymer when treating corn seed already treated with insecticides or when mixing with seed applied insecticides.

Polymer application rates range from 3 to 9.5 ounces per 100 pounds of seed.

Do not use treated seed for food, feed or oil purposes.

Information regarding the contents and levels of metals in this product is available on the internet at: <http://aapfco.org/metals/htm>

Notice of Warranty

Seller warrants that the product conforms to its chemical description and is reasonably fit for the purposes stated on the label when used in accordance with directions under normal conditions of use. SELLER MAKES NO OTHER EXPRESS OR IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, NOR IS ANY REPRESENTATIVE OF SELLER AUTHORIZED TO MAKE ANY SUCH WARRANTY OR MODIFY THESE TERMS. This warranty does not extend to the storage, handling or use of this product contrary to label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to Seller, and Buyer assumes the risk of any such storage, handling or use. Seller shall not be responsible for incidental or consequential damages, if any, resulting from a breach of warranty.
