FIFRA

Section 2(ee) Recommendation

Date: May 3, 2017

Product: Acuron® Herbicide, EPA Reg. No. 100-1466

Plus

Northstar® Herbicide, EPA Reg. No. 100-923

or

Status Herbicide, EPA Reg.No. 7969-242

Use: Tank Mixture of Acuron Herbicide Plus Northstar® Herbicide or Status® Herbicide for Postemergence Control of Broadleaf Weeds in Field Corn

State: AL, AR, CO, CT, DE, GA, IA, ID, IL, IN, KS, KY, LA, MA, MD, ME, MI, MN, MO, MS, MT, NC, ND, NE, NH, NJ, NM, NV, OH, OK, PA, RI, SC, SD, TN, UT, VA, VT, WA, WI, WV, WY

Directions for Use

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- The user must refer to the federally approved labels for the above noted product and read and follow all directions for use, restrictions, and precautions.
- The user should have this recommendation in its possession at the time of use.
- Use of this product according to this bulletin has not been reviewed or endorsed by the Office of the Indiana State Chemist.
- This recommendation for use of this product is permitted under Section 2(ee) of FIFRA and has not been submitted to or been approved by EPA.

Tank-mix Acuron Herbicide at 1.5 to 3.0 qt/A + Northstar at 5 oz/A or Status at 2.5 to 10 oz/A + nonionic surfactant-(NIS) at 1 qt/100 gal + spray grade ammonium sulfate-(AMS) at 8.5 lb/100 gal for improved broadleaf weed control as a postemergence spray in field corn.

A solo glyphosate product that is registered for use over-the-top in glyphosate tolerant field corn may also be added to this tank mixture. If the glyphosate product has a built-in adjuvant system (i.e. the product label does not ask for additional adjuvant), only spray-grade ammonium sulfate (AMS) at 8.5 lb/100 gal should be added to this mixture. A postemergence application of glyphosate to corn that is not glyphosate tolerant will result in crop death.

Refer to the Northstar, Status and glyphosate labels for specific use rates and directions.
