Control of Various Weeds Infesting Dichondra grown for Seed (For Distribution and Use Only in the State of California)

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This labeling must be in the possession of the user at the time of application.
- Read the label affixed to the container for Stinger* herbicide before applying. Carefully follow all precautionary statements and applicable use directions.
- In additions to restrictions and limitations imposed by this supplemental labeling, use of Stinger is subject to all use precautions and limitations imposed by the label affixed to the container for Stinger.

Directions for Use

Location: Statewide

Crop/Site/Commodity: Dichondra seed production

Target Pest/Problem: Weeds such as black medic, clover, thistles, and nightshades

Dosage: 1/4 to 2/3 pints/acre depending on weed species treated. See product label for Stinger.

Dilution Rate: 10 to 100 gallons/acre

Method of Application: Applications are to be made with conventional broadcast equipment equipped with nozzles to ensure coverage and minimize drift. A non-ionic surfactant may be used to increase efficacy.

Frequency/Timing of Application: Multiple applications can be made but the total amount applied per year can not exceed 2/3 pints per acre.

Field Reentry After Application: 12 hours

Precautions: This product can affect susceptible broadleaf plants directly through foliage and indirectly by root uptake from treated soil. Therefore, do not apply this product directly to or allow spray drift to come in contact with flowers, grapes, tomatoes, potatoes, beans, lentils, peas, alfalfa, sunflowers, soybeans, safflower, or other desirable broadleaf crops and sensitive ornamental plants or soil where these crops will be planted the same season.

Restrictions:

- Do not contaminate irrigation ditches or water used for irrigation or domestic purposes
- Do not apply by aircraft
- Do not use in a greenhouse

Chemigation: Do not apply this product through any type of irrigation system
