Refer to the Engenia® herbicide container label, EPA Reg. No. 7969-345, for complete Directions For Use and all applicable restrictions and precautions. This label and the Engenia container label must be in the possession of the user at the time of pesticide application.

Use of preemergence herbicides that provide soil residual control of broadleaf and grass weeds, and are labeled for use in soybean fields, is recommended before using this product. Applying such herbicides at the maximum rate allowed by the label is recommended. Use of preemergence herbicides reduces early season weed competition and allows for timelier in-crop postemergence herbicide applications. Preemergence herbicides include but are not limited to acetochlor, clomazone, dimethenamid, flumetsulam, metribuzin, pyroxasulfone, saflufenacil, sulfentrazone, and trifluralin.
