

Leonardite Plus™ Granular

LEONARDITE PLUS GRANULAR is a form of naturally mined humic acids from leonardite shale in the United States of America.

LEONARDITE PLUS GRANULAR when applied to the soil, increases soil particle aggregation and soil structure with resulting increases in aeration, tilth, workability, as well as better water movement from increased soil capillary and non-capillary space. The cation exchange capacity of the soil is markedly increased, thus improving longer term retention of applied inorganic fertilizers. LEONARDITE PLUS GRANULAR increases the buffering properties of the soil and chelation of metal ions, and is effective in converting Iron into available forms for plant uptake.

RATES OF APPLICATION

FRUIT TREE CROPS AND NUTS

Apply 40 pounds per acre, split up between number of applications if incorporated with the fertilizer. If applied alone, make two applications of 20 pounds per acre each, one in January and one in July.

ROW CROPS AND VEGETABLES

Apply 40 pounds per acre if applied by itself prior to planting, then incorporate by tillage before planting. If applied with fertilizer, apply 20 pounds per acre in the initial application with another 20 pounds per acre split up between remaining fertilizer applications. Application should be directed at the area of which the plant roots are located. Treatment of middles are not necessary.

MIXING INSTRUCTIONS

LEONARDITE PLUS GRANULAR can be premixed with granular fertilizer either in the field or at the fertilizer plant. LEONARDITE PLUS GRANULAR also can be applied by itself to the crop by a broadcast spreader over the entire root areas of the crop to be grown. Incorporation into the soil by tillage is recommended.

Optimum rates of application will vary between crops and fields, depending on soil and organic matter content. For best results, follow soil test or plant analysis recommendations.

CAUTION: KEEP OUT OF REACH OF CHILDREN MAY BE HARMFUL IF SWALLOWED

In case of contact with eyes, flush with water. Contact physician if irritation persists. Dispose of container in accordance with local, state and federal regulations.

NONPLANT FOOD PRODUCT

Humic Acid 65.0%

Derived from Leonardite. F76
Purpose: Soil amendment

Warranty: Seller warrants that the product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use; but neither this warranty nor any other warranty of merchantability or fitness of a particular product expressed or implied, extends to the use of this product contrary to label conditions, or under conditions not reasonably foreseeable to the seller; and buyer assumes the risk of any such use.
