GENERAL INFORMATION

UltraSurf AMS is a premix of AMS and surfactant designed for use with glyphosate systems or other pesticides. UltraSurf AMS is designed to make glyphosate herbicide formulations work better by guarding against hard water antagonism, offer faster wetting and spreading enhancing herbicide movement through the cuticle on the leaf surface, and increasing the percentage of glyphosate absorbed into the phloem of the plant. UltraSurf AMS makes herbicides work better, faster and longer than many other adjuvant formulations.
