GENERAL INFORMATION: Apply only as directed.

FeRRROMECC[®] Plus Micros is formulated for soil and foliar applications and is designed to supplement all fertilizer programs. It is an excellent tank mix buffer. FeRRROMECC[®] Plus Micros can be applied through injection and drip irrigation, fertigation and conventional sprayer systems. Low moisture conditions may limit nutrient uptake, so a minimum dilution of 1:30 in water is recommended. Maximum dilution should not exceed 1:600.

Compatibility: FeRRROMECC[®] Plus Micros is tank mix compatible with most soluble fertilizers, herbicides, pesticides, fungicides and absorbent gels. As with all chemicals, read all labels for compatibility verification and, if practical, test on a small area prior to extensive use with other chemicals. **DO NOT APPLY WITH ALUMINUM BASED FUNGICIDES.**

DO NOT APPLY NEAR WATER, STORM DRAINS, OR DRAINAGE DITCHES. DO NOT APPLY IF HEAVY RAIN IS EXPECTED. APPLY THIS PRODUCT ONLY TO YOUR LAWN/GARDEN.

TURF

FeRRROMECC[®] Plus Micros can be used on all warm and cool season turfgrasses. Spray volumes can range from 1-4 gallons per 1000 sq. ft. for adequate coverage. When tank-mixing FeRRROMECC[®] Plus Micros with amine herbicides, spray volumes should be 2 gallons per 1,000 sq. ft. or more. Three to five applications per growing season usually produce the best results.

- Turf – including sport fields, greens & tees
 - 1.0 fl. oz. / 1,000 sq. ft. every 2 weeks
 - 2.0 fl. oz. / 1,000 sq. ft. every 4 weeks
- Fairways – cool and warm season
 - 48.0 fl. oz. / acre every 2 weeks
 - 96.0 fl. oz. / acre every 4 weeks
- Overseeding –
 - 2.0 fl. oz. / 1,000 sq. ft. after germination
- Sod installation –
 - 2.0 fl. oz. / 1,000 sq. ft. at installation

NOTE: Turfgrass will typically utilize 1-4 lbs. of nitrogen per 1,000 sq. ft. each growing season. Use this product in conjunction with an additional fertilization program to provide at least 1 lb. of nitrogen per 1,000 sq. ft. each growing season.

Consult your local Agricultural Extension Agent for the proper amount of nitrogen to be applied in your area.

Foliar fertilization is intended as a supplement to a regular fertilization program and may not, by itself, provide all the nutrients normally required by plants.

In the state of Virginia, this product may be used only on 1) Newly established turf areas from sod or seed during the first growing season; 2) Turf areas being repaired or renovated; and 3) Turf areas where soil tests performed within the past three years indicate nutrient deficiency.
