GENERAL INFORMATION

MULTI-CHE 5N-9ZN is a versatile solution that can be combined with pH neutral solution fertilizers and applied at planting time, side-dressed or by means of irrigation. This product is intended primarily for soil application, however, it can be used in foliar applications as well.

MULTI-CHE 5N-9ZN provides an alternative for use in correcting Zinc deficiencies where low to moderate soil pH's exist and the use of less expensive sulfate forms are not feasible because of incompatibility with commonly used liquid fertilizers.

DIRECTIONS FOR USE

SOIL APPLICATION RECOMMENDATIONS

ALL FIELD AND ROW CROPS: Apply 1 to 8 quarts of MULTI-CHE 5N-9ZN per acre in liquid fertilizer blends. The actual rate will depend on crop sensitivity, moisture, placement and plant growth stage.

ALL TREE AND VINE CROPS: Apply up to 6 quarts per acre of MULTI-CHE 5N-9ZN through sprinkler irrigation and not more than 2 quarts per acre through drip irrigation. When application is made through shank equipment, do not exceed 2 quarts per acre.

FOLIAR APPLICATION RECOMMENDATIONS

ALL CROPS: Generally a rate of 1 to 2 quarts per acre of MULTI-CHE 5N-9ZN in a minimum of 20 gallons by ground and no more than 1 quart in 5 gallons by air.

Consult with your Crop Production Services, Inc. Crop Advisor or Loveland Products, Inc. representative for proper recommendations.

FIRST AID
