

Boron 10%

Agricultural Application

Boron 10% is ideal for blending mixed fertilizers for soil application. Granule size and bulk density closely match other fertilizer ingredients providing uniform distribution of plant nutrients.

Boron 10% is product containing both calcium and sodium borate, Sodium borate is highly water soluble and calcium borate is less soluble for extended availability.

Boron 10% is agronomically preferred in low CEC soils because of plant physiological uptake.

Crops Indicated

Alfalfa, Cotton, Potatoes, Soybeans, All Clovers, Turnips, Corn, Tomatoes, Wheat, Asparagus, Sugar Beets, Brussels Sprouts, Cabbage, Carrots, Celery, Broccoli, Apple, Pears, and Plums.

Soil Conditions

Coarse Textured, Cool, Wet Organic, and Soils with High pH and Low CEC Levels. Rates will vary dependent on CEC + or - 10.

Guaranteed Analysis

Boron (B) 10.0 %

Derived from Ulexite

When applied as directed, this product meets the guidelines for metals adopted by the Association of American Plant Food Control Officials.

Amount of Product per Acre will provide the Following:

	5 lbs/A	10 lbs/A	15 lbs/A	20 lbs/A
Boron	0.5 lbs/A	1.0 lbs/A	1.5 lbs/A	2.0 lbs/A
