

At Sustâne, we believe in the science of sustainability, which is why we've commissioned over 500 independent research studies over the past 25 years to create the best possible products for the professional horticulture, agriculture, and lawn & garden industries. The same products that have long been trusted by professional organic growers are now available to home gardeners.

Sustainability is the message for our times and since 1987, Sustâne Natural Fertilizer has been proud to be a leading brand committed to this message and the movement toward building a more sustainable world.

Uses and Application Rates | 1 cup = 0.3 lb.

Cantidades para el uso y la aplicación:

Sustâne Concentrated Compost Soil Conditioner & Organic Plant Food is a nutrient rich, biologically stabilized, dried and screened soil amendment that is both a high quality compost and an organic fertilizer.

Sustâne Concentrated Compost is easy to apply and replenishes the soil with a rich supply of stabilized organic matter, beneficial microorganisms, and essential nutrients required for quality growth. Use Sustâne Concentrated Compost to improve garden soils, potting mixes, raised bed media, and to rebuild depleted soils.

This product is allowed for use in the production of certified organic fruits and vegetables. Permitido para el uso en la producción de frutas y vegetales orgánicos.

Application Timing: Apply at the beginning of the growing season or once every three months. For best results, use in combination with other Sustâne Plant Foods and Compost Tea.

Colocar al principio de época de cultivo o una vez cada 3 meses. Para obtener mejores resultados, utilizar en combinación con otros fertilizantes naturales de Sustâne.

Para establecer el pasto trasplantado: distribuir antes de plantar 50 libras por cada 1.000 pies².

Coverage: 18 lb. covers 360 ft² at 1 lb. of nitrogen per 1,000 ft²

Cobertura: 18 libras cubre 360 pies² de 1 libra de nitrógeno por 1.000 pies².

For best results, water after application. Application rates vary based on soil conditions, plant species and desired rate of growth. It is recommended to have soil tested prior to applying any fertilizers.

Benefits of Concentrated Compost:

- Increases beneficial soil microbial populations, which promote nutrient cycling
- Improves soil structure, porosity, and stability, leading to greater root development
- Increases the nutrient and water holding capacity of the soil
- High nutrient concentration reduces the need for additional fertilizer
- Feeds plants for up to 3 months
- Increases yield
- Reduces nutrient loss from leaching
- Buffers soil pH
- Low moisture makes the product easy to handle

Guaranteed Analysis:

Total Nitrogen (N).....	2%
0.2% Ammoniacal Nitrogen	
0.2% Other Water Soluble Nitrogen	
1.6% Water Insoluble Nitrogen*	
Available Phosphate (P ₂ O ₅).....	6%
Soluble Potash (K ₂ O).....	3%
Calcium (Ca).....	5%
Magnesium (Mg).....	1%
Sulfur (S).....	1%
Iron (Fe).....	0.5%
Manganese (Mn).....	0.05%
Zinc (Zn).....	0.05%

Derived from aerobically composted turkey litter and molasses

*1.6% slowly available nitrogen from aerobically composted turkey litter

ALSO CONTAINS NONPLANT FOOD INGREDIENTS:

- 4% Humic acid from aerobically composted turkey litter
- 50% Organic matter from aerobically composted turkey litter

Contains 5,000 Colony Forming Units (CFU's) per gram of the following species:

Bacillus amyloliquefaciens.....	1,000 CFU's per Gram
Bacillus subtilis.....	1,000 CFU's per Gram
Bacillus pumilus.....	1,000 CFU's per Gram
Bacillus licheniformis.....	1,000 CFU's per Gram
Bacillus megaterium.....	1,000 CFU's per Gram
