

SOIL REVITALIZER

Mineral Composition • For Row Crops

HELPS BREAK DOWN SALT AND SOIL COMPACTION

Soil Revitalizer 10-0-0 contains balanced minerals and Humic acids with live microbes. This mineral composition helps break down salt and soil compaction to help release “tied up” minerals in the soil. Specially cultured SEBS soil-microbes decompose chloride and other sodium based salt that interferes with soil pH.

It is recommended that the soil be tested prior to application. In some cases, it may require 2 or more applications to bring the pH back to normal, depending on salt and other mineral compaction. Regular application of this product can keep the soil pH balanced and eliminate the annual dry lime application.

During and after this treatment, avoid applying other high salt-based fertilizer products. Soil tests are necessary to determine proper rate of application and dosage required per acre for 10-0-0. Contact your supplier for customized application details.

DIRECTIONS FOR USE:

Apply as directed. Shake well before using.

AGRICULTURE:

28 to 32 ounces of concentrate per acre. It may be used in combination with fertilizers, soil conditioners, and herbicides.

PURPOSE:

Soil Revitalizer sweetens and neutralizes the soil. It creates a better environment for plant growth in the same manner as calcium carbonate (lime) or calcium sulfate (gypsum). Manganese Sulfate, Zinc EDTA.
