

DOUBLETAKE™

Insecticide / Insect Growth Regulator

PRODUCT INFORMATION BULLETIN

Supplemental Recommendation
For the Use of DoubleTake (EPA Reg. No. 400 – 593)
on Soybeans

FIFRA 2(ee) recommendation for use and distribution in the states of Alabama, Arkansas, Florida, Georgia, Mississippi, North Carolina, South Carolina and Tennessee

Under FIFRA 2(ee) DoubleTake is recommended for use on soybeans

Target Pest	Rates (Fl. Ozs./A)	Application Instructions
Kudzu bug (bean plataspid)	2 to 4	For optimal control and minimal damage, apply at first sign of infestation. Use the 4 fl.oz./A rate when the crop has a history of high infestations, where dense foliage is present, and /or when longer residual control is desired.

This recommendation is made as permitted under FIFRA section 2(ee) and has not been submitted to or approved by the EPA. Observe the warranty statements and conditions specified on the label for DoubleTake. It is important to read and observe all restrictions, precautions and other information appearing on the label.
