ProNatural COPPER is a proprietary formulation that has been specially reacted with emulsion polymerization that provides a wide range of mixing ease with other fertilizers or chemicals.

DIRECTIONS FOR USE

SHAKE WELL BEFORE USING. KEEP FROM FREEZING.

Dilute 1 part ProNatural COPPER with 20 or more parts water. Apply using a spray method in an adequate amount of water that will provide complete coverage of the plants.

ProNatural COPPER can be included in a regular spray program on crops. Consult with a Wilbur-Ellis representative on compatibility with other spray materials.
