FOR MITE CONTROL ON AGRICULTURAL CROPS, ORNAMENTAL PLANTS, AND IN PROFESSIONAL LANDSCAPE SETTINGS.

ACTIVE INGREDIENTS
Geraniol (2-trans-3,7-dimethyl-2,6-octadien-1-ol) .............. 0.417%
Citronellol (3,7-Dimethyl-6-octen-1-ol) .......................... 0.417%
Nerolidol (3,7,11-Trimethyl-1,6,10-dodecatrien-3-ol) ....... 0.417%
Farnesol (3,7,11-Trimethyl-2,6,10-dodecatrien-1-ol) ....... 0.167%
OTHER INGREDIENTS .............................................. 99.582%
TOTAL .............................................................. 100.000%

CAUSES SUBSTANTIAL BUT TEMPORARY EYE DAMAGE. CAUSES SKIN IRRITATION, HARMFUL IF SWALLOWED.

WARNING

PERSONAL PROTECTIVE EQUIPMENT (PPE)
Applicants and other handlers who may be exposed to the residue through application or other tasks must wear coveralls over a long-sleeved shirt and long pants, socks, shoes, chemical resistant gloves and protective eyewear. Discard clothing and other absorbent materials that have been drenched or heavily contaminated with this product's concentrate. Do not reuse them.

environmental hazards
For terrestrial uses: Do not apply directly to water, or to areas where the surface water is present or to intermittent areas below the mean high water mark. Do not contaminate water when cleaning equipment or disposing of equipment washwater or rainwater.

directions for use
It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only properly protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

net content: 3 quarts

Agricultural Use Requirements

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR Part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and restrictions to the statements on the label about personal protective equipment (PPE), and restricted-entry intervals. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 4 hours or until sprays have dried.

PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated such as plants, soil or water is:
- Coveralls
- Chemical resistant gloves
- Shoes plus socks
- Protective eyewear

Have product container or label with you when calling a poison control center or doctor for treatment advice.

General information
Biomite is a minimum risk biochemical miticide that controls mites, Eotetranychus spp., Tetranychus spp. and Panonychus spp, including two-sprayed mites, panicume mite, williamette mite, citrus rust mite, broad mite and the European red mite. Biomite is a miticide with a novel mode of action which inhibits the development of this pest population. Use this product in conjunction with integrated pest management (IPM). Use Biomite alone or in rotation with other miticides.

Read all directions for use before applying this product.

mixing
Biomite has been found to be compatible with most commonly used pesticides and fertilizers. Test for compatibility before using this product in a tank mix with other pesticides or with fertilizers. To test for compatibility, mix a small amount of each product, in the proportions indicated, in a small jar, and agitate mixture thoroughly.

Do not apply with surfactants.

Biomite has been evaluated for phototoxicity on a wide range of crops and ornamentals. However, since testing on all varieties of all crops and ornamentals is not possible, use a small portion of the area to be treated for phototoxicity before treating the entire area. Further, all possible combinations or sequences of pesticide sprays, including fertilizers, surfactants, adjuvants and other pesticides, have not been tested, thus testing for phototoxicity of spray mixtures is recommended.

Add Biomite to an empty spray tank followed by water to halt the required amount. Agitate the mixture thoroughly and then fill the tank with the remaining water. Thorough mixing is necessary for uniform coverage. For tank mixes, add the other pesticide or fertilizer products to the tank mix according to the directions for use on those product labels. Typically, the least soluble products will be added first followed by the most soluble products. Agitate mixture thoroughly and use immediately.

Chemigation: Do not apply this product through any type of irrigation system.

Application Notes: Apply Biomite as soon as mites are identified on the plants, or when conditions favor mite outbreaks. Additionally, Biomite is effective under cool environmental conditions early in the season. Biomite is most effective on low to moderate infestations.

Storage and Disposal
Do not contaminate water, food, or feed by storage and disposal.

pesticide Storage: Store in a cool, dry area until used. Store in original container at temperatures not exceeding 104°F.

pesticide Disposal: Wastes resulting from the use of this product must be disposed of on site or at an approved waste disposal facility.

Container Disposal: Non-combustible container. Do not reuse or refill this container.

Metal: Triple rinse (or equivalent) promptly after emptying. Triple rinse as follows: Empty remaining contents into approved waste disposal facility, then rinse with water. Pour rinsates into approved waste disposal facility, then rinse with water. Store and dispose of in a sanitary landfill, or by other procedures approved by State and local authorities. (Plastic): Triple rinse (or equivalent) promptly after emptying. Triple rinse as follows: Empty remaining contents into approved waste disposal facility, or mix with other acceptable materials prior to mixing and transport. Do not contaminate water, food, or feed by storage and disposal.

First Aide:

If in Eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.

If swallowed: Call a poison control center or doctor immediately for treatment advice.

If on Skin or Clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

Keep out of reach of children.
