Amsurf®/Xtra reduces fine droplets that result in spray drift\* while increasing spray deposition for improved uptake by the targeted weed species.

Amsurf®/Xtra at 2.5 gallons per 100 gallons:

- Delivers 8.5 lbs of ammonium sulfate
- Delivers 1 qt of surfactant blend
- Delivers a optimized rate of a drift reduction agent/deposition aid

*\*Spray drift reduction is dependent on many factors including equipment setup and weather conditions. For proper management of spray drift and spray deposition, all factors, including the condition and settings of the equipment and wind speed and direction, humidity and temperature must all be taken into account.*
