

Section 24(c) Special Local Need Label

FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF MICHIGAN

**Caparol® 4L Herbicide
For Control of Weeds in Dill**

**EPA Reg. No. 100-620
EPA SLN No. MI-140009**

**This label expires and must not be distributed or used in accordance with this SLN registration
after December 31, 2024**

DIRECTIONS FOR USE

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This label must be in the possession of the user at the time of application.
- Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the EPA-registered label.

Make one pre-emergence (post planting) or one post-emergence application of Caparol 4L Herbicide at the rates of 3.2 pt/Acre, 1.6 lb active ingredient (ai)/Acre, per application at least 30 days before harvest. Make uniform applications of the herbicide in a minimum of 20 gallons of water per acre.

Restrictions

1. Do not apply more than 3.2 pints of Caparol 4L Herbicide (1.6 lb of prometryn) per acre per season.
2. Do not harvest within 30 days of application.

To Avoid Injury to Dill:

1. Use on sand or loamy sand may delay emergence or thin the stand. Postemergence application may delay maturity.
2. Do not apply if dill is under water stress.
3. Do not apply Caparol 4L Herbicide postemergence with other pesticides. Apply only after foliar applications of other pesticides are dry.
4. Do not apply within 2 weeks after an application of an herbicidal oil.
