Serifel is an agricultural biofungicide/bactericide product for suppression of select foliar plant diseases in tobacco.

This supplemental labeling expires November 10th, 2018, and must not be used or distributed after this date.

Active Ingredient:
* Bacillus amyloliquefaciens strain MBI 600*†…………………………………………………………………………………………... 9.9%
* Other Ingredients: ……………………………………………………………………………………………………………………………... 90.1%
* Total: ……………………………………………………………………………………………………………………………………………... 100.0%

*Serifel contains a minimum of 5.5 x 10^10 viable spores per gram
†Formerly named *Bacillus subtilis* strain MBI 600

EPA Reg. No. 71840-18
CAUTION/PRECAUCION

Directions For Use

- It is a violation of federal law to use this product in a manner inconsistent with its labeling.
- The supplemental labeling and the entire Serifel container label, EPA Reg. No. 71840-18, must be in possession of the user at the time of application.
- Read the label affixed to the container for Serifel before applying.
- Use of Serifel according to this labeling is subject to the use precautions and limitations imposed by the label affixed to the container for Serifel.

Product Information

This package contains Serifel, a wettable powder (WP). The active ingredient in Serifel is *Bacillus amyloliquefaciens* strain MBI 600, a beneficial microbe providing suppression of listed foliar diseases in tobacco. Apply Serifel preventively in low to medium disease pressure situations. Serifel can be applied as a foliar spray or a directed or banded spray. Serifel can be applied alone or in a tank mix with other registered pesticide products, unless otherwise noted in the Crop-Specific Directions. Apply Serifel in a regularly scheduled protective spray program and use in a rotation program with other registered pest control products. Under higher disease pressure situations, Serifel can be tank-mixed with other registered pesticide products.

Restrictions and Limitations

- Crop Rotation Restriction - None
- Preharvest Interval (PHI) – 0 Day
- Re-entry Interval (REI) – 4 hours
- Not for use in greenhouse or transplant production
- Not for use in California on crops marked with an asterisk (*) in Crop-Specific Directions
