

SAP VG

ANTI-TRANSPIRANT

PRINCIPAL FUNCTIONING AGENTS:

Di-1-p-menthene, polyterpene hydrocarbon, alkylaryl ethoxylate	96%
Constituents Ineffective as a spray adjuvant.....	4%
TOTAL	100%

All ingredients are exempt from tolerance requirements under 40 CFR 180.

KEEP OUT OF REACH OF CHILDREN CAUTION

GHS HAZARDS: H303 May be harmful if swallowed. H317 May cause an allergic skin reaction. H333 May be harmful if inhaled. **GHS PRECAUTIONS:** P102 Keep out of reach of children. P103 Read label before use. P233 Keep container tightly closed. P234 Keep only in original container. P261 Avoid breathing dust/fume/-gas/mist/vapors/spray. P264 Wash hands thoroughly after handling. P270 Do not eat, drink or smoke when using this product. P281 Use personal protective equipment as required. P301+312 IF SWALLOWED: Call a POISON CENTER or doctor/physician if you feel unwell. P302+352 IF ON SKIN: Wash with plenty of soap and water. P304+340 IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing. P305+351+338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do then continue rinsing cautiously.

FIRST AID

EYE CONTACT - IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do then continue rinsing. Have the product container with you when calling a poison control center or doctor, or going for treatment.

SKIN CONTACT - IF ON SKIN OR CLOTHING: Take off contaminated clothing and wash it before reuse. Wash with plenty of soap and water for several minutes. Call a poison center, doctor, chemical manufacturer, importer, or distributor to specify the appropriate source of emergency medical advice.

INGESTION - IF SWALLOWED: Unless advised otherwise by a poison control center or doctor, have person rinse mouth with water, if able. Do not give anything by mouth to an unconscious person. Call a poison center, doctor, chemical manufacturer, importer, or distributor to specify the appropriate source of emergency medical advice if you feel unwell.

INHALATION - IF INHALED: If breathing is difficult, remove person to fresh air and keep at rest in a position comfortable for breathing. If person is not breathing, call 911 or an ambulance, and then give artificial respiration, preferably mouth to mouth if possible.

GENERAL INFORMATION:

SAP VG is an anti-transpirant agent intended for use with fruits, vegetables and other uses to reduce moisture loss by the plants. Adding a thin coat of **SAP VG** can provide a water impermeable film that reduces water loss from transpiration. Use on fruits and vegetables to improve size, reduce pre-harvest fruit drop, minimize sunburn incidence, and improve color in some varieties.

Application of **SAP VG** can improve the establishment and survival of plants exposed to stressful or adverse environmental conditions. Spray **SAP VG** for full coverage or use as a dip.

SAP VG needs to be applied at least one hour during daylight, before an anticipated rainfall. Sunlight is needed for this period of time, for the protective film to set. No additional spreader is needed with **SAP VG**.

DIRECTIONS FOR USE:

Fill the spray tank with 1/2 - 3/4 of the required amount of water and begin agitation. Add the recommended amount of **SAP VG** and add the balance of water. Maintain agitation during mixing and spraying to ensure a uniform emulsion. It is also advisable to pre-mix **SAP VG** with water, before adding to the spray tank.

The applicator/user must have experience with this product or must conduct a phytotoxicity test at the full use rate on a small test patch or on a plant BEFORE starting large scale usage.

NOT FOR AQUATIC USE

USE RATES:

Fruits: Apply **SAP VG** at the rate of 1 gallon per acre in enough water for good coverage (100 to 500 gallons per acre). Do not use in a spray tank combination with any pesticide. Make application about 4-6 weeks before harvest.

Vegetables: **SAP VG** is applied at 1 gallon per acre in adequate water (approx. 100 gallons per acre) for good coverage.

Turf: 1 gallon per 40 or 50 gallons of water. Apply thoroughly until leaves are completely covered.

STORAGE AND DISPOSAL:

STORAGE: Store in a cool well-ventilated place. To avoid product degradation and equipment corrosion, do not use iron, copper or aluminum containers or equipment. Material is hygroscopic and should not be exposed to moisture in order to maintain product integrity. Keep in original container tightly closed. Do not reuse empty container. Do not store with food, feed, or other material to be used or consumed by humans or animals. Do not contaminate water supplies. For optimal storage, store between 40° and 90° F.

DISPOSAL: Do not contaminate water, food or feed by storage or disposal. Dispose of contents in container to an approved waste disposal facility in accordance with all local /regional/national/international regulations. Triple rinse (or equivalent) adding rinse water to application tank. Offer container for recycling or dispose of in a sanitary landfill or by other procedures approved by local regulations. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. To contact your state and local ACRC recycler visit the ACRC web page at www.acrecycle.org. Decontaminated containers may also be disposed of in a manner allowed by local, state and federal laws and regulations.

WARRANTY STATEMENT: Seller warrants that this product conforms to its chemical description and is reasonably fit for the purpose stated on the label, when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of merchantability or fitness for a particular purpose, expressed or implied, extends to the use of this product contrary to label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to the seller, and buyer assumes the risk of any such use.
