

ITERA

Section 24(c) Special Local Need Label

FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF NEW JERSEY

**Reglone® Desiccant
For Weed Control in Row Middles of Tomatoes**

**EPA Reg. No. 100-1061
EPA SLN No. NJ-180002**

**This label expires and must not be distributed or used in accordance with this
SLN registration after December 31, 2025**

DIRECTIONS FOR USE

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This label must be in the possession of the user at the time of application.
- Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the EPA-registered label.
- Failure to follow the directions for use and precautions on this label may result in poor pest control, crop injury, or illegal residues.

Reglone Desiccant can be applied as a post-directed application to the row middles either prior to transplanting or as a post-directed hooded spray application to the tomato row middles when the transplants are well established.

Apply 1 quart of Reglone Desiccant in 20 to 50 gallons of water per treated acre when weeds are 2 to 4 inches in height. Do not exceed 25 psi spray pressure. A maximum of two applications can be made during the growing season. Weed control will decrease when treatment is made beyond the 4 inch stage of growth. Always add 2 pints of a 75% nonionic spreader per 100 gallons of spray mix.

Restrictions

- Do not allow spray to contact crop foliage or treat under conditions which will cause spray drift, as phytotoxicity to crop plants will result. **Do not apply when wind speed exceeds 5 mph.**

- Do not use dirty or muddy water for Reglone Desiccant dilution as Reglone Desiccant will be inactivated.
 - Do not apply later than 30 days before harvest.
 - Do not apply this product for this use through any type of irrigation system.
