## Loyant<sup>®</sup> CA

EPA Reg. No. 62719-743

**Special 2(ee) Recommendation<sup>†</sup>**  
(For Distribution and Use in the State of California)

### For Control of Cattail (*Typha latifolia*) in Rice

Refer to product label for Loyant<sup>®</sup> CA for general use precautions, mixing directions, application directions, and restrictions.

#### ATTENTION

**†This recommendation is made as permitted under FIFRA Section 2(ee) and has not been submitted to or approved by EPA.**

- It is a violation of federal law to use this product in a manner inconsistent with its labeling.
- Read the label affixed to the container for Loyant CA insecticide before applying. Carefully follow all precautionary statements and applicable use directions except as specified below.
- Use of Loyant CA according to this Section 2(ee) recommendation is subject to all use precautions and limitations imposed by the label affixed to the container for Loyant CA.

#### Directions for Use

For control of cattail in rice fields, apply Loyant CA at 1.33 pt/A plus 0.5 pt/A MSO as a broadcast spray to cattail plants up to 3 ft tall. Apply in sufficient water to provide good coverage of the cattail without washing spray solution from leaves. A second application may be made if needed with a minimum retreatment interval of 14 days.
