

SBC K-Oxy

Description

A proprietary blend of:

- 0% Nitrogen
- 2% Phosphate
- 27% Potassium

Contains short and long chain
Carbon & protein groups.
Derived from Potassium Carbonate

Features

- Soluble Potassium nutrition
- Humic & fulvic acids
- 3 pounds of potassium per gallon
- Economical potassium source

Benefits

- Increased Potassium uptake
- Decreased water stress
- Enhanced carbohydrate production
- Cost-Efficient
- Generates an in-soil oxygen release

Rates & Timing

- 1 to 2 gpa
- Apply 2 to 8 gpa per season.
- Apply to soil; can be applied through drip & micro sprinklers.
- Don't apply through overhead sprinklers or as a foliar.

Tank Mixing Considerations

- Compatible with most fertilizer products.
- Always jar test before applying.
