#### GENERAL INFORMATION

PREMIUM CROP OIL CONCENTRATE is a blend of highly refined phyto bland spray oil and a special surfactant system. It is designed for use where the pesticide label recommends the use of an oil concentrate adjuvant. PREMIUM CROP OIL CONCENTRATE improves wetting and spreading of spray solutions that results in a more uniform coverage of plant and pest surfaces. It also reduces the evaporation loss of spray droplets due to variations in temperature or humidity. PREMIUM CROP OIL CONCENTRATE is an oil-based formulation that aids in the penetration of waxy leaf cuticles.

PREMIUM CROP OIL CONCENTRATE meets DuPont guidelines for crop oil concentrates.

**Read this entire label before using this product.**

#### DIRECTIONS FOR USE

**Ground:** 1 - 4 pints in 20 - 50 gallons of spray solution

**Air, CDA, Low Volume:** 4 - 8 pints per 100 gallons of spray (0.5% - 1.0% v/v concentration)

Do not use less than ½% by volume or more than 2.5% by volume. The above recommendations are adequate for most uses. However, some pesticides may require different adjuvant rates. When this occurs, follow the pesticide label directions. Environmental conditions, equipment condition, crop health, pest infestation levels and the accurate operation of spray machinery can influence the effects of the pesticide and the spray application itself. Therefore, it is recommended that adjuvant concentrations be adjusted based on careful observation of spray deposits.
