# Iron Dextro-Lac<sup>®</sup>

Information regarding the contents  
and levels of metals in this product  
is available on the internet at  
<http://www.aapfco.org/metals.htm>.

Helping Nature Work<sup>SM</sup>

## Directions for Commercial Use:

Iron Dextro-Lac is intended for foliar use. Apply 1 to 4 quarts per acre (2.5 to 10 liters per hectare) with sufficient water for thorough coverage. For best results, spray in early morning or late afternoon. Do not apply during the "sunlight" hours when air temperature is 85°F/30°C. Foliar fertilization is intended to supplement standard ground fertility programs and will not by itself provide all nutrients normally required by agricultural crops. If you have any questions regarding mixing or application rates contact your Agro-K dealer before using this product.

## Guaranteed Analysis:

Iron (Fe) 5.0%

Derived from  
Iron Carbonate

Net Wgt. 25 lbs. /2.5 gal
