## Helping Nature Work<sup>SM</sup>

\*Phosphorous Acid products are for use as a supplemental fertilizer treatment. Upon foliar application, the phosphite ions are taken up directly by the plant foliage and may undergo a degree of conversion to phosphate ions, or be used directly by plants, as phosphite ions.

\*As a soil application to annual crops, a lesser response from the initial crop, with a corresponding superior response from succeeding crops, may be observed. In addition, placement close to seeds or root zones may be injurious to crops. This effect may be aggravated by a soil pH below 6.5.

### Directions for Commercial Use:

System-K is for soil or foliar use. Foliar: Apply 1 to 3 quarts per acre (2.5 to 7.5 liters per hectare) with sufficient water for thorough coverage. Product can be applied at 7 to 14 day intervals for a maximum of 5 times during the growing season. Spray in early morning or late afternoon. Do not apply during the "sunlight" hours when air temperature is above 85° F/30° C. Foliar fertilization is intended to supplement standard ground fertility programs and will not by itself provide all nutrients normally required by agricultural crops. Soil Use: Apply 2 to 5 quarts per acre (2.5 to 12.5 liters/hectare). Product can be injected in to irrigation systems or band sprayed at the base of crop row. If you have any questions regarding mixing or application rates contact your Agro-K dealer before using this product. System-K is compatible with many fertilizers and pesticides, but a compatibility check is recommended.

### Guaranteed Analysis:

**Total Phosphoric Acid (P<sub>2</sub>O<sub>5</sub>) 30%\***  
**Soluble Potash (K<sub>2</sub>O) 20%**
