USES

1. For specific application rates follow the recommendation of a qualified individual or institution, such as, a certified crop advisor, agronomist, university crop extension publication, or apply according to recommendations in your approved nutrient management plan.

ADVANTAGES

1. The 1:1:1 ratio of N-P₂O₅-K₂O has long been a favorite of California farmers and is noted for its excellent handling characteristics which assures even field distribution. All its potash is from sulfate of potash which is safe to use on valuable vegetable crops at the high rates required for profitable yields in California.

SAFETY

Slight irritation may result from eye contact or prolonged skin contact. Not generally considered toxic. Nonflammable.
