

15-15-15 with 10% Sulfur

To comply with different state regulations, Avail 15-15-15 with 10% Sulfur has 2 different labels. The correct Guaranteed Analysis, as noted below, will appear on the label according to your location.

ALL STATES / GUARANTEED ANALYSIS

Total Nitrogen (N).....	15.00%
13.00% Ammoniacal Nitrogen	
2.00% Urea Nitrogen	
Available Phosphate (P ₂ O ₅)*	15.00%
Soluble Potash (K ₂ O).....	15.00%
Sulfur (S).....	10.00%

*15.00% Available Phosphate coated with Maleic Itaconic Copolymer.

Additional Label Guarantee for AVAIL in CALIFORNIA AND ARIZONA

ALSO CONTAINS NON-PLANT FOOD INGREDIENTS:

0.27% Maleic Itaconic Copolymer (AVAIL)

Derived from Monoammonium Phosphate, Urea, Ammonium Sulfate and Muriate of Potash.

This product contains a chemical known to the State of California to cause cancer, birth defects or other reproductive harm. Proposition 65, the Safe Drinking Water and Toxic Enforcement Act of 1986, requires notification of potential exposure to substances identified by the State of California as causing cancer, birth defects or other reproductive harm.

Information regarding the contents and levels of metals in this product is available on the Internet at <http://www.regulatory-info-jr.com>

PHYSICAL CHARACTERISTICS

Lbs. of Nutrients/Ton:	Nitrogen (N)	300	Bulk Density:	60 lbs. per cubic foot
	Phosphate (P ₂ O ₅)	300	Solubility in Water:	90% (% of guaranteed P ₂ O ₅)
	Potash (K ₂ O)	300	Granule Size:	90% retained by Tyler screen mesh #16.
	Sulfur (S)	200		(This is an in-line product of uniform, free
	Combined Nutrient Total	1100		flowing granules.)

ALSO INCLUDES NON-PLANT FOOD INGREDIENT (LBS./TON)

Maleic Itaconic Copolymer (AVAIL) 5.4

USES

1. For specific application rates follow the recommendation of a qualified individual or institution, such as, a certified crop advisor, agronomist, university crop extension publication, or apply according to recommendations in your approved nutrient management plan.
2. Each granule contains an accurate portion of all plant food nutrients guaranteed on the label providing a uniform supply of nutrients to any crop. It is especially effective on vegetable crops.

ADVANTAGES

1. Avail 15-15-15 with 10% Sulfur should be used at the same rates as non-coated 15-15-15 with 10% Sulfur. Avail for Granular Phosphates (Patent No. 6,525,155), a non-plant food ingredient designed for coating on granular phosphate fertilizers, sequesters antagonistic ions in the soil surrounding the fertilizer granule, reduces tie-up of phosphate, and makes phosphate more available to the plant. Avail increases phosphate availability through all stages of plant growth, including early development, the most crucial period for increasing yield potential. Avail is water soluble, biodegradable and nontoxic. If undisturbed, Avail continues to inhibit phosphate fixation throughout the growing season.
2. Is a highly concentrated homogeneous fertilizer pellet that contains 10% sulfur and a 1:1:1 ratio of N-P-K.
3. Note the Sulfur content of 10%. Each ton of product contains 200 pounds of sulfur. When applying, common application rates for N-P-K, it will also provide the sulfur requirements for many crops. An important factor – the sulfur is in the sulfate form – a readily available plant nutrient.
4. The high concentration of plant food results in dollar savings in storage, transportation, and application.

SAFETY

Slight irritation may result from eye contact or prolonged skin contact. Not generally considered toxic. Nonflammable.
